PM: Chris Moore

ALLEN CO. MUSEUM ADDIT./RENOV, LIMA, OHIO

Project start date:	May-06
Project completion date:	June-07
Total project dollars:	\$ 3.3 Million
Construction type:	Construction Manager

Project scope:

Project scope included a 17,000 SF 2 story addition to the existing building and renovation of 33,000 SF. Addition included a storage/support area on the lower level with mechanical services to control humidity for storage of collections. The main level addition included a new main entrance lobby and children's discovery center. The children's discovery area has unique construction features including a stone arched tunnel and the facade of a turn of the century school house. Renovated areas included the reprogramming of existing space to add a new classroom area and research room

Project accomplishments:

The project required close attention to safety of the staff and public as the museum is located on a tight site and the facility stayed in operation through out construction. With many school tours and limited parking and lay down areas, constant coordination was required with the owner to ensure safe access to the building. Through open communication with the museum staff, the owner was able to continue it's operations during a difficult renovation/addition project.
