## NEW LIMA SR. HIGH SCHOOL, LIMA, OHIO

<b>Construction start date:</b>	May 2002
<b>Project completion date:</b>	August 2004
<b>Construction cost:</b>	\$31,949,515 (7% under budget)
<b>Construction type:</b>	Construction Management

### Project Scope:

This new, two and three story high school facility, of 289,224 square feet, houses a student capacity of 1,350. The building envelope consists of a steel frame and masonry-bearing walls with a brick veneer, a rubber membrane roof and architectural aluminum doors, windows and window-wall system. The interior is made of a slab-on-grade first floor and bar joist supported concrete second and third floors, with painted masonry block walls, carpet and vinyl tile floor coverings, and ceramic tile restrooms. The new school includes a kitchen, cafeteria, auditorium, two gymnasiums, computer labs, a vocational education wing, along with the latest technology equipped classrooms.
