NEW PREK-12 SCHOOL, SPENCERVILLE, OHIO

Construction start date:	May 2005
Project completion date:	December 2006
Construction cost:	\$28,903,097
Construction type:	Construction Management

Project Scope:

This new 179,529 square foot PreK-12 school facility was built on 30-acres of land square behind the original high school. The building houses a gymnasium seating between 1,700 and 1,750 and a combined cafeteria and auditorium that seats 850 people. There is also a large open room media center. The new facility includes a geothermal mechanical system that significantly saves the district in operating costs. Now the new school is a "single campus" structure for the district, combining three existing facilities into one.
