Superintendent: Scot Cox

NEW HIGH SCHOOL, ELIDA, OHIO

Construction start date: Spring of 2009

Project completion date: Summer of 2010

Construction cost: \$40,000,000

Construction type: Construction Management

Project scope:

Construct a new 168,000 square foot High School facility. The new building will seek LEED Silver Certification through the USGBC. The building will have a geothermal based HVAC system utilizing a "chilled beam" delivery system. Another unique feature includes a rain water collection system for building non potable water usage. The building will have a dedicated auditorium, cafeteria, and gymnasium. Although the building is being built on a green field site, the design will use LEED best practices for rain water run off and filtration including the use of bioswales.

Project accomplishments:

This project is currently in the construction phase and is on schedule and under budget.
