NEW PK-3 ELEMENTARY SCHOOL, BROOKVILLE, OH

Construction start date: January 2009

Project completion date: May 2011

Construction cost: \$9,126,700

Construction type: Construction Management

Project scope:

Construction a new 51,757 square foot elementary school facility that houses grades K-3. The building exterior is made up of brick veneer with steeply sloped metal roofs and a cupola in the center. The building houses: a computer lab, 18 classrooms, a library with circus themed ceiling tiles, gymnasium with a fluid applied floor, student dining with stage, and an admin area, an exterior land lab for learning, recycled picnic tables, benches, trashcans, rain barrels, cold frames, and is filled with many native plants. There is a ceramic tile fundraising wall located in the corridor outside the gym. The classrooms consist of mostly carpet. The library has reading steps in a semi-circular fashion looking out the large windows to the learning lab. This building is designed for 450 students. The aesthetic design of the new facility has a more classical interpretation. The entire building is fully wired for today's technology and security that includes monitored entries and exits. The new building is targeting LEED Silver Certification through the USGBC.

Project accomplishments:

This project was completed on time and within the owner's targeted budget.
