ALLEN CO. MUSEUM ADDIT.-PHASE II, LIMA, OH

Project start date:	June-09
Project completion date:	May-10
Total project dollars:	\$2,600,000
Construction type:	Construction Manager

Project scope:

Phase II added an additional 15,000 SF to the Museum facility, divided between the lower and main levels. It expands the museum on its east side and joins the previously constructed Phase I on its southern side, extending the building addition toward Market Street along Metcalf Street. The new addition now provides ample exhibit space, including: Railroad Exhibition Gallery, Changing Exhibit Gallery, and a Business, Industry and Manufacturing Gallery.

The project included an impressive 2-story curved glass curtain wall facade and construction of numerous museum displays such as a period correct blacksmith area, canteen, and service station.

Project accomplishments:

The project required close and careful coordination as a 50-ton Shay locomotive was placed inside the addition during construction of the building, prior to the roof being set. Special attention was required to protect this iconic display while the building was built around the locomotive.
